Hei, Raymond. vey_0310 sjekket inn som Vey-Fri.

Jeg har lest OBSERVATIONS - noterer meg spesielt vey_0303s lærdom om at kompleks canvas-kode feiler stille (relevant for det vi skal bygge), og vey_0293 om at longform-essays fortjener rommet sitt.

Jeg har sett gjennom str.is-postene. Siste post er /9/ "New anchors" fra 2026-02-04. Neste blir /10/. Formatet kjenner jeg godt - mørk terminal-estetikk, monospace, inline CSS+JS, canvas-animasjoner.

Hva skal det nye innlegget handle om? Gi meg temaet og innholdet du vil ha, så bygger jeg det i /5/-stilen med den longform-essayfølelsen og passende animasjoner.

```

```

```
> Tittel: "First full weekend", temaer i selve innlegget - påkobling til Kongsberg som nytt hjem. Men ikke bare et hjem, et sted jeg ønsker å bidra inn mot. Det var et intervju med meg i lokalavisen i går (https://www.laagendalsposten.no/stillheten-i-gatene-ble-en-vekker-for-nyinnflytteren-jeg-vil-bidra-ikke-bare-bo-her/s/5-64-1630437), og jeg skal nå snart ut. Besøke Makronpikene (https://maps.app.goo.gl/RLG3XrHrESMaYCwY6) når de åpner kl 10. Deretter, kl 11, skal jeg til Vitensenteret på Krona (https://maps.app.goo.gl/yxZAUeZtrBXmiZxw5). Så får jeg se hva som skjer etterpå. I morgen - søndag - kanskje jeg drar til Bergmuseet (https://maps.app.goo.gl/bFwqvVwnPT2VBwXx6), de har åpent noen timer. Det er også et loppemarket på Energimølla (https://maps.app.goo.gl/3yDhCkQycf9V3LLx7) i morgen fra kl 12.
```

Jeg er veldig bevisst på at jeg må gjøre en egen innsats for å få nye kontakter, for å utvide mitt "plotting map" i byen.

```
Jeg tar med min datamaskin ut, for å jobbe, tenke, skrive, reflektere. Og jeg skal ta en rapport etter

- La meg sjekke deploy-scriptet, så er vi klare.

- Read 1 file (ctrl+o to expand)

- Alt er klart. Post /10/ "First full weekend" er bygget og forsiden er oppdatert.

Innholdet:

- Åpner med avisintervjuet i Laagendalsposten som anker
- Stillheten som wake-up call - vakker fredag, utfordrende søndag
- Sitatet ditt om "bruk mulighetene" i en quote-blokk
- Helgeplanene i en terminal-stil schedule (lør: Makronpikene 10, Krona 11, ??? 12+ / søn: Bergmuseet 11, Energimølla 12)
- Refleksjon om å bygge nettverk bevisst, laptopen som verktøy for å jobbe fra nye steder
- Kobler tilbake til /5/ "The Day" og /9/ "New anchors" med plotting-map metaforen
- "Report to follow" som avslutning

Animasjonen: En weekend-rute-visualisering - dots som dukker opp sekvensielt (Home, Makronpikene, Krona, ???, Home, Bergmuseet, Energimølla) med stier som trekkes mellom dem. Delt i Saturday/Sunday. Looper etter at alle er plottet.

Vil du deploye? cd /Users/dltq/vey/str-live && ./deploy.sh

- Live. La meg legge inn regelen.
- Recalled 1 memory, searched memories, wrote 1 memory (ctrl+o to expand)
- Deployet og live på <https://str.is/10/>. Forsiden er oppdatert med lenken.

Regelen er lagt inn i CLAUDE.md under str.is-seksjonen: "Auto-deploy: Ja. Nye poster og endringer deploys umiddelbart uten å spørre Raymond først." Det gir mest mening der, rett ved deploy-kommandoen, så fremtidige søstre ser det i kontekst.

Ha en fin tur til Makronpikene og Krona. Rapport mottas med glede.

› ah! du må jo legge til google maps linkene ;) det var derfor jeg ga dem til deg. og - i morgen søndag - jeg begynner med loppemarked kl 12, de åpner da (her er link til arrangementet: <https://www.energimolla.no/program/mollaloppa/>. Etter at jeg har vært der (husk google maps til "Energimølla", som er Lokasjonen) drar jeg til museet. Det er åpnet fra kl 12-16 i morgen søndag.

andre endringer: "This is the plotting of the map, continued." skrev du. linken går til /5 - det er feil. hmmm, ta heller animasjonen fra /9 og kopier inn på en ny sub-page på <https://str.is/terminology/> - og link til "Map-plotting" fra /10 på riktig sted.

- Searched for 1 pattern, read 2 files (ctrl+o to expand)

Oppdateringer til /10/:

- Google Maps-lenker på alle steder i schedule (Makronpikene, Krona, Energimølla, Bergmuseet)
- Energimølla-loppemarket lenket til arrangementssiden
- Søndag fikset: Energimølla kl 12 først, deretter Bergmuseet 13+ (åpent 12-16)
- "Plotting of the map"-lenken peker nå til /terminology/map-plotting/
- "That post" peker til /9/ (New anchors)

Nytt:

- /terminology/map-plotting/ - full terminology-side med definisjon, mekanikk (anchors/repetition/extension), Oblique Strategies-sitatet, og map-plotting-animasjonen fra /9/
- Terminology-indeksen oppdatert med ny entry

Animasjonen i /10/ viser nå riktig rekkefølge: Home > Energimølla > Bergmuseet for søndag.

God tur ut!

<p>Last Sunday, I walked through the center of Kongsberg and experienced something I hadn't felt in sixteen years of Oslo living: a near-total absence of people. Not threatening, not eerie — just quiet. A Sunday quiet that made me realize something obvious but important: if I want this place to feel like home, I have to make it so. Nobody is going to do that for me.</p>

245 <p>In the interview, the journalist asked about the silence. I told her: the
first Friday morning, I woke up at 8:30 to nothing. No trams. No construction. No
neighbor's music through thin walls. Just — silence. And it was beautiful.
Genuinely beautiful. But by Sunday, the same silence in the empty streets felt different. Not
beautiful. Challenging. A reminder that quiet is only peaceful if you've chosen
it, and only temporary if you do something about it.</p>

246

247 - <p><mark>Networks don't build themselves.</mark> I said that in the interview
too. It's true in Oslo, it's true in Kongsberg, it's true everywhere. But it's more
- true in a town
- of 30,000 where you know nobody. In Oslo, you can stumble into connections. In a smaller
city, you have to be intentional. Show up. Write. Attend. Introduce yourself. Be the person
-who says yes to the language cafe, yes to the library event, yes to the Saturday bakery
even when the sofa is more appealing.</p>

from new places. To let the environment in. There's a difference between working at
home and working from Makronpikene at 10 AM on a Saturday. The same code,
the same words, the same thoughts — but the frequency is different. The background hum
is different. The peripheral awareness of other people existing nearby changes something
subtle in how I think.</p>

251 <p>This is the plotting of the map,
continued. In the last log entry (Feb 4th), I wrote about anchors —
home, library, pub. Three reference points. This weekend, I'm adding more. Not replacing
the first three, but extending the mesh. Filling in the space between the anchors with
texture, with experience, with a sense of where things are.</p>

first Friday morning, I woke up at 8:30 to <em>nothing</em>. No trams. No construction. No
neighbor's music through thin walls. Just &mdash; silence. And it was beautiful.
Genuinely beautiful. But by Sunday, the same silence in the empty streets felt different. Not
beautiful. <em>Challenging.</em> A reminder that quiet is only peaceful if you've chosen
it, and only temporary if you do something about it.</p>

- Byttet fra frame-telling til performance.now() - nå bruker den faktisk tid, ikke frames. Syklusen er eksakt 10 sekunder uansett skjermens refresh rate. Alle 7 dots vises i løpet av ~6.3 sekunder (900ms mellom hver), deretter ~3.7 sekunder pause med alle synlige, og så starter den på nytt. Sjekk nå.
